

CHRONIC DISEASES

OF THE

Liver, Blood, and Lungs

THEIR TRUE NATURE, RATIONAL TREATMENT, AND
POSITIVE CURE.

By R. V. PIERCE, M. D.,

Author of the "People's Common Sense Medical Adviser," over 300 Pages, nearly 300 Illustrations, and Founder of the World's Dispensary and Invalids' Hotel, Buffalo, N. Y., branch at Great Russell Street Buildings, London, England.

NEW HOPE FOR THE AFFLICTED.

The writer desires to preface the consideration of the diseases mentioned at the head of this article by saying that the truthfulness of the new and rational treatment of diseases which he is about to advocate, has been confirmed by a vast experience, embracing the successful treatment of thousands of cases at the largest medical sanitaria in the world, and he therefore pronounces his views without fear of their being suspected as untrustworthy. The diseases here mentioned, to a large extent, have affected us all, and many diseases of diverse descriptions, and affecting various organs. Many of these diseases are usually treated as if primary affections, both physician and patient being doomed to disappointment in an utter lack of veritable results; for to treat a disease successfully we must have a clear conception of its true nature.

LIVER DISEASE.

The liver is the largest gland in the human system. It is the great purifying organ of the system, and has very appropriate been called the "household of the body." I have observed in the dissecting room, and also in making postmortem examination of the bodies of those who have died of different diseases, that in a large proportion of cases the liver has given evidence of having at some time been diseased. Liver affections are equal to heart diseases.

Liver Complainant and Consumption.—R. V. Pierce, M. D.—Dear Sir: Your Golden Medical Discovery has cured a disease of the liver, accompanied with bronchitis, which had been incurable by three doctors and spent over \$100 in past medical expenses.

I have been a patient of Dr. Pierce's for six weeks, and the doctor has cured me of my liver complaint, and has made me well again.

Mrs. G. H. STICKLER, Cincinnati, Ohio.

CONSUMPTION.—R. V. Pierce, M. D.—Dear Sir:—I have been a patient of Dr. Pierce's for six weeks, and some disease of the liver, as I had terrible pains under the ribs, and an enlargement of the right side in the chest, and was told by the best physicians in Illinois without benefit, both giving Dr. Pierce's Golden Medical Discovery and Pollets. To my astonishment I commenced to improve, and am now perfectly well, as no one thought I could live. I was afflicted with consumption, and had been treated by various physicians. They are now fully and finally healed.

JAMES STICKLER, Cincinnati, Ohio.

LIVER COMPLAINANT.—Dr. R. V. Pierce—Dear Sir: I recommended your Golden Medical Discovery to a doctor who had been unable to cure me of my liver complaint, and he was perfectly cured.

W. J. COOPER, Cincinnati, Ohio.

LIVER COMPLAINANT.—Dr. R. V. Pierce—Dear Sir: My mother suffered from disease of the liver for two years, with no relief, and could not stop the cough, and fever, and consumption. It stopped the cough and cured me, and I have remained well ever since.

Mrs. E. S. STICKLER, Jonesboro, Tenn.

CONSUMPTION.—R. V. Pierce, M. D.—Dear Sir:—I have been a patient of Dr. Pierce's for six weeks, and some disease of the liver, as I had terrible pains under the ribs, and an enlargement of the right side in the chest, and was told by the best physicians in Illinois without benefit, both giving Dr. Pierce's Golden Medical Discovery and Pollets. To my astonishment I commenced to improve, and am now perfectly well, as no one thought I could live. I was afflicted with consumption, and had been treated by various physicians. They are now fully and finally healed.

JOHN C. DAUGLASS, Cincinnati, Ohio.

Diseases Caused by Clogged or Torpid Liver.

CONSUMPTION.—Dr. R. V. Pierce—Dear Sir: The bile-poisoned blood passes from the upper and left cavity of the heart to the lower cavity, thence to the lungs, circulating through all parts of the most delicate tissue, and the result of this is that the pores are clogged, and irritated, and the tissues become torpid, which the blood is bound to bring them into motion. In this way consumption, which is scrofula of the lungs, is so defined by all the most scientific authors, as established.

BRONCHITIS.

The bile-poisoned blood is in a measure oxygenated and purified by the lungs, but in this effort these organs may be overworked and irritated, and the foul blood may be smelled in the sputum offensive breath. Nervous cough, bronchitis, and consumption itself are the natural result.

HEART DISEASE.

The blood impeded with the accumulated serum, and the heat of duly simulates the nerves of the heart, and if this can be long continued, it produces chronic irritation, palpitation, or undue excitement, and moral nutrition of that organ, developing many forms of heart disease.

KIDNEY DISEASE.

The impure blood, which a torpid liver fails to purify, affects not only the heart, but also other important organs. In its circulation it passes through the lungs to the upper left cavity of the heart, thence to the lower cavity, and thence through the arteries and capillaries to every tissue and organ of the system. The kidneys are among the most important of those organs, and when they become torpid, the result is that of the urine. They become enlarged, lose irritability, and caused by the presence of the bile-poisoned blood, and Bright's Disease, Diabetes, and kindred affections result. The urine becomes scanty, high colored, and at times loaded with red deposits or other diseased products, which produce irritation and inflammation of the bladder, thus adding another malady to the already lengthy catalogue of ailments.

SICK HEADACHE.

The brain, which is the great electrical centre of all vitality, is unduly stimulated by the unhealthy blood which passes it from the heart, and it fails to perform its office healthfully. Hence dullness, dizziness, sick headache, really only another name for bilious headache, and other nervous affections, such as vertigo, giddiness, drowsiness, and irritability of temper.

SKIN DISEASES.

The blood poison, nothing being left off by the liver, accumulates throughout the body, and when it is retained in the skin, either in the form of eruptions, blisters, and sores, or in the form of ulcers, carbuncles, or abscesses, it is then called scrofula. There are no other diseases than those of the skin, which are more difficult to cure, than those of the liver.

DISSOCIATION AND CONSTIPATION.

The effects of all medicines which operate upon the system through the medium of the blood are really to act as purgatives, and to move the bowels, and to remove the accumulated serum, and the result of this is that of the diarrhoea. These are the chief causes of constipation, and the bowel movements are impeded, the rectum is strained, and caused by the presence of the bile-poisoned blood, and Bright's Disease, Diabetes, and kindred affections result. The rectum becomes septic, high colored, and at times loaded with red deposits or other diseased products, which produce irritation and inflammation of the bladder, thus adding another malady to the already lengthy catalogue of ailments.

YANKEE MEDICAL ADVISER.

Dr. R. V. Pierce—Dear Sir: I have been using your Golden Medical Discovery and Pollets for liver disease, and I was induced to try your Golden Medical Discovery and Pollets. At the time I was scarcely able to walk, and I had a constant pain in my liver, and the doctor said I had consumption. I am now perfectly well, as no one thought I could live. I was afflicted with consumption, and had been treated by various physicians. They are now fully and finally healed.

JAMES STICKLER, Cincinnati, Ohio.

BLOOD DISEASES.

Medical authors describe about fifty varieties of skin diseases, which are all due to the action of the blood, and the removal of the impurities, humors, infusions, purples, acids, etc., from the body.

SCROFULOSIS.

Long series of diseases commonly known as scrofulosis, including consumption, tuberculosis, and other forms of pulmonary disease, are all due to the action of the blood, when it is retained in the skin, and when it is retained in the lungs, heart, and liver.

SCROFULOSIS.

These symptoms of liver disease, and its resultant affections may differ according to the circumstances, altitude, temperature, age, or constitution of the individual, and the degree of the disease, but the result is the same. The impure blood is slow and sluggish, and these symptoms are the result of the disease, and the result of the disease is the same in all cases.

YOU CAN SAVE LARGELY.

If you will buy the Discovery and Pollets by the half dozen or dozen bottles, in lots of the Blood Discoveries, and the Discovery and Pollets, you will save money, when it is bought in such quantities, than the price of single bottles, and the Discovery and Pollets, and the Discovery and Pollets.

SCROFULOSIS.—Dr. R. V. Pierce—Dear Sir: My son has been suffering from extreme affections upon the blood, and I am trying to improve him upon your Golden Medical Discovery and Pollets. At the time I was scarcely able to walk, and I had a constant pain in my liver, and the doctor said I had consumption. I am now perfectly well, as no one thought I could live. I was afflicted with consumption, and had been treated by various physicians. They are now fully and finally healed.

YANKEE MEDICAL ADVISER.

Dr. R. V. Pierce—Dear Sir: I am happy to inform you that our Cataract Remedy effects a radical cure of the eye, and I am sending you a sample of our Cataract Remedy, and Pouche, and Discovery sent by mail for one stamp. Address WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

SCROFULOSIS.

The symptoms of liver disease, and its resultant affections may differ according to the circumstances, altitude, temperature, age, or constitution of the individual, and the degree of the disease, but the result is the same. The impure blood is slow and sluggish, and these symptoms are the result of the disease, and the result of the disease is the same in all cases.
